While all attempts have been made to verify information provided, neither I, nor any ancillary party, assumes any responsibility for errors, omissions, or contradictory interpretation of the subjectmatter herein.

As the FTC Rules requires, we do not guarantee or imply that by using this tool, you will get rich or make money at all.

Software and associated files is distributed as is without any warranty of any kind, either express or implied.

Software and associated files is not freeware or shareware.

Selling or distribution of the code (in whole or in part) of this program without prior written consent is expressly forbidden.

Installing The Plugin.

Installing the plugin is like installing any other WP plugin.

Step 1: Go to the "Plugins" section and click.

Step 2: Click "Add New" and Upload the included zip file.

Step 3: Activate it.

----- Intentionally Left in Blank -----

Quick Plugin Overview.

The plugin allows you to set a cookie for your affiliate link/s when your visitors visit your wordpress pages / posts, so if they don't click your links, you still get paid in case they buy the product/s later.

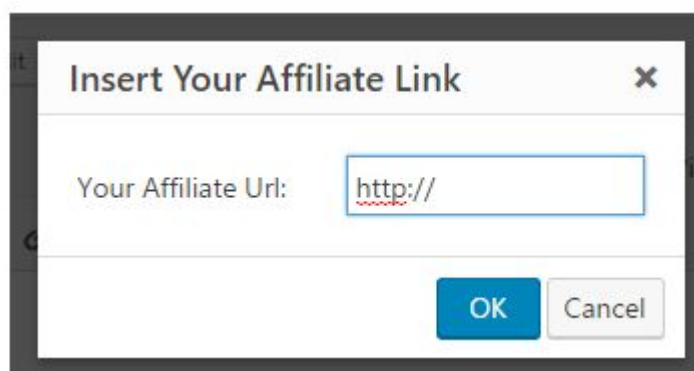

Using The Plugin.

Using the plugin is really easy.

First, go to any wordpress page / post...

Click the “Affiliate Miner” button and insert your affiliate link...

Finally, save your WP page / post and that's all.

Final Comments.

1. The plugin works with affiliate networks that support iframing (like JVZoo, ClickBank etc - at least at the moment of writing this).
2. You can add as many affiliate links as you need per page / post (we recommend no more than 3 per page / post, to speed up the load of your page).
3. Avoid adding links of sites that autoplay videos / audios, or your visitors will also hear them.
4. In the “Pro” version (which you already have), “Affiliate Miner” is automatically deactivated for Search Engine Bots (not for regular visitors), so IFRAMES (which are used by “Affiliate Miner” are not served to search engines.

Using IFRAMES it's not bad at all, but using a low number of IFRAMES is good to keep your SEO strategy in good shape, that's why the software will disable the usage of IFRAMES when traffic comes from search engine bots.

That's all!
