

A collage of various stock photos including landscapes, nature, people, and objects, with the text "All in One Free Stock Photos Wordpress Plugin" overlaid. The photos include a city street, a person's face, a motorcycle, a bottle of wine, a sunset, a fire, a hand holding a ring, a colorful building, a tree, a mountain, a person taking a photo, a flower, and the aurora borealis.

The All in One Free Stock Photos plugin will allow you to find and insert free stock photos from the top 3 free stock photo sites quickly and easily.

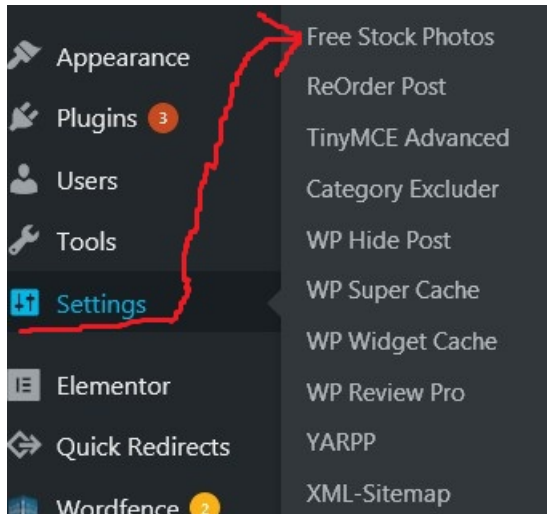

How to Use

How to install a wordpress plugin? Watch video here:

<https://youtu.be/AXM1QgMODW0?t=220>

After installing and activating the wordpress plugin, here's how to use the plugin below.

- 1) Upon successful activation, there will now be a “Free Stock Photos” option in your Settings menu as seen here:

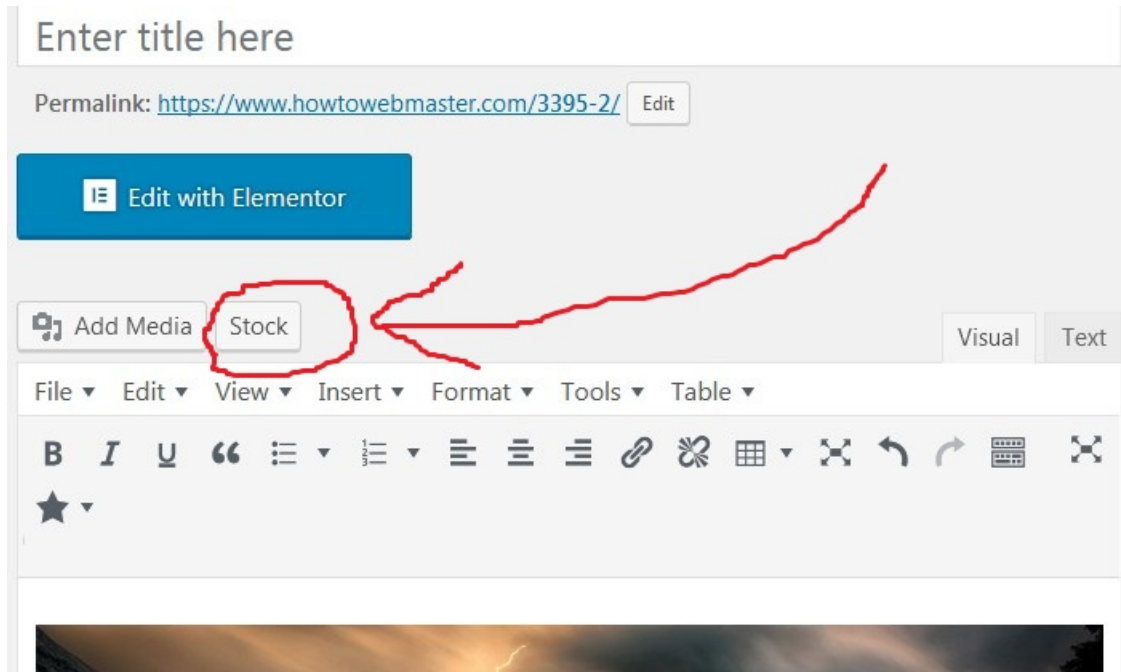

The settings are pretty straightforward, leave the “Button” checked so that you can easily access the free stock photos search by clicking on the “stock” button above your posts or pages.

A screenshot of the plugin settings form. It has a light gray background. At the top, there is a section labeled 'Attribution' with a checkbox labeled 'Insert image credits' which is currently unchecked. Below this is a section labeled 'Button' with a checkbox labeled 'Show Stock button next to "Add Media"' which is checked. At the bottom left of the form is a blue button with the text 'Save Changes' in white.

You can also choose to automatically add attribution to the free stock photos inserted into your post or not. *Pixabay and unsplash do not required attribution. Only some photos from pexels may need attribution. It is recommended to leave this box unchecked.

- 2) You can now quickly access the free stock photos search and insert by clicking on the “stock” button.

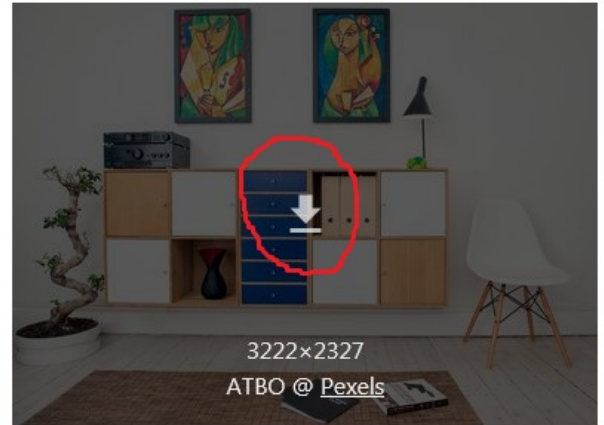

A popup will now appear and allow you to search for free stock photos from pixabay, pexels, unsplash, or all at the same time.

You can enter in a keyword, browse for the photo you want, and click on the download icon to instantly download the photo. You can also view a preview by click on the source link below the download icon.

Upon clicking on the download icon, you can then change some image settings (like image sizes) and directly insert the image as seen below.
