Finding Out The Purpose Of Your Life

Synopsis

In absence of a goal in life, you will not know what to do.

It is important to understand the importance of your existence

When you try to think about what is the mission or purpose of your life, you may not get a clear picture of it. We lack clarity and intelligence for finding our real purpose in life.

It is possible that you may have many goals in your life and may not be able to identify the real one, specific to you. How to bring that one mission out of your mind that will lead you to success? What will happen if you are not able to relate to your dreams? What is next?

Important Info

Your connection with reality may be the foundation of your purpose. Not having decided purpose in life does not mean you do not have one. It is not something you will just wake up to, one day. You have to work hard to determine it. You may not have the option of choosing it, as you have many choices. Many of the choices may not even be genuine.

While targeting at your purpose you will have to exhibit the ability to perceive it. You need create a method to achieve your purpose, steps that will lead you to your purpose of life. These methods and processes get you the answer for you question and make you say, “This is it!”

Once you determine your goal, you work towards achieving it passionately. So the first step is to go with your emotional intelligence because it will help you identify your purpose correctly.

Here is how you go about it:

1. You need something to write down, like a piece of paper or word processor in your computer.
2. At the top of the page jot down, “What is the real purpose of my life?”

3. Whatever answer comes to your mind write it down. It may be short a short phrase and not a properly framed sentence as an answer.

4. Keep on repeating step three, until you have tears of joy on finding purpose of your life.

This is what you have been struggling to find. Your profession will not matter. To some this may make sense and others may find it to be senseless. The purpose of our life will be clear to us because of social training on the subject and the brain does not take more than 15-20 minutes to clear the mess in our mind. Your unconscious and conscious mind will send false messages. However, once you have found the true purpose, you feel like it has come from another world.

Applying logic and reasoning to find out what are your views on life is another method. It will be easy for you to do this if you are more precise and immaculate.

The other way around is to use logic and reason to work for your situation. It will be easy if you are more exact and clear in your thoughts.

Apply your total context of real situation on yourself, to find out your real purpose in life. Try to understand where you stand in your present understanding of reality.

This is a very simple way to follow and hence easy to miss it. What you are doing is, understanding your view on your approach of life and turning those into your qualities.

Where you stand in your present interpretation on situation in life, to discover your goal, you need to find out. Your total context of reality represents yourself and this helps you understand your purpose of life.

The ideas you have about life makes your personality, if you have negative attitude towards life that means you are negative person. When you are clear about your ideas, you will find the purpose of life, which is achievable and reasonable. It is like a hologram. When you cut a piece of it, the entire picture is still in the smaller piece. You are like a piece and the whole of hologram is reality. You will find that something is wrong when you have wrong ideas about yourself in your mind so, this technique will discover what problems you have about the notions about reality.

Both techniques will help you find out your purpose and to know where they lead you. If you have a healthy context, you will get results by applying both the techniques. You will find out that the rational and emotional intelligence will point out to your purpose of life in different ways but they will be saying the same thing.

Chapter 4:

Do Not Restrict Your Mind With Boundaries

Synopsis

“Whatever goal you set, you can achieve it”, this you need to keep reminding yourself to be successful.

If you have some restricted thinking about money you will never be able to accumulate wealth.

Here we will try to find out, what your restricted beliefs about money are, and how it is hampering its influx in your life.

Think Big

You will find out about the negative thoughts that do not allow free flow of money into your life and stop you from gaining wealth, with help of the theories that I am going to put forward in this book. If you use them in your life nobody can stop you from being affluent.

You have strong resistance towards money if you are not at ease following any of the few suggestions.

You will have to ask yourself why you are not comfortable to carry out the suggestions, as this will help you come out of the limited thinking beliefs about money.

While going through the steps, you may not be comfortable doing some of them. To get comfortable with those steps keep repeating them until you develop a comfort level. This will help you remove all the restricted thinking you have about money. In addition, you will welcome wealth into your life and get out the no money status in your life.

As you go through the steps, you will find them to be very simple. However, actual implementation may not be that easy if you have strong limiting belief about money. Find out the reasons for such feelings and try to eradicate them permanently from your mind.

You will be able to check your feelings, when you try to visualise what you want in life. This will help you to put it into practice whatever changes you need to bring about in your life.

For example, when you are walking down the street and you see a luxurious car parked outside a shop.

You ogle at the beauty of the car. You are staring at the beautiful exterior of the car. Even the exclusive interior of the car is visible to you.

What are your thoughts that are running in your mind? What are your feelings at that moment? Get to know them as they occur in your mind so that you can write them down.

If you are thinking as mentioned below that means your understanding about money is restricted.

1. "The person driving the car is such a show off."
2. "The person driving the car could have donated the money to the needy instead of spending it on the car."
3. "It is out of my budget."
4. "Some homes may cost as much as this car, so what's the use of buying such costly car."
5. "The car driver is an attention seeker, so it is not something I look up to."

6. "People, who are filthy rich, will be able to buy such car and so it is not something I can afford."
7. "It is cool car, but I do not have that kind of money to buy it."
8. "Even if I slog out all my life I will not earn enough to purchase such luxurious car."

If you have positive thinking about money, your thoughts will be as follows:

1. "Wow! This is one of my favourite cars."
2. The money flows into my life so easily that I have to only decide when I need to purchase the car and the car will be mine.
3. "I am sure this person has the ability to fulfil all his wishes."
4. "What a groovy car! I know I will be having one of such car in future."
5. "I am so lucky to have come so close to such successful person who has achieved so much in his life."
6. "It feels good to know that people can afford such cars."
7. "If I let this car come into my life through my positive thinking, it will definitely have it."
8. "If you say to yourself that you can afford it". (It may not be possible immediate future but because of positive thinking you may)
9. "If say that I can already feel that the car is in my life."

Try to understand your feeling, when you get what you desire after thinking positively about the situation. Your feelings about money will be clear as soon as you are in tune with the source.

Chapter 6:

“Attraction” A Powerful Tool

Synopsis

In our day-to-day conversation, we have all come across the theory of law of attraction with use of words like “positive thinking” and so. The theory may be new for us, but spiritual thinkers have had belief in these theories since many years.

Draw It In

Our power of thinking is very strong. It attracts whatever we want into our life. All of the universe will work towards achieving what we desire for whenever, we think or talk about it.

If we think negatively, we will be uttering negative words often. “I will not be able to perform” or “I am not capable of”. The Universe will pick up these words from your thoughts and give it back to you. Negativity will keep you away from your goal.

You can bring changes in your life by being positive about everything in your life. Your life will not change overnight it will take time. Once you seed positive thoughts in your life, it will bear desired fruit for you eventually. Start by feeling good about yourself and love yourself. As you water your seed of positive thoughts, it transforms your life and brings about necessary changes.

⇒ Be sure of what you want in life. Once you have decided on that, you can ask universe to help you achieve it. Try to create a clear image of what you desire.

⇒ Concentrate on your thoughts and watch what you say about your object of desire. Act and feel that what you are asking for is on your way. You will have to trick yourself in believing

that what you desire is on its way and you need to feel the feeling.

⇒ Listen to your instinct, co-relate to them and understand what the universe is signalling at you. Receive all the messages with open mind. Universe is giving assurance to you that what you want is on its way. You will gain financial success as soon as you are able relate with Universe.

Chapter 7:

Self-Introspection

Synopsis

Wrong notions in mind will lead you nowhere. You will never be able to attain the kind of wealth.

Many people believe that they do not have the ability to earn the kind of money that is need for living luxuriously. They have negative ideas in their mind. What others think about them, have become basis for analyzing their own self. They strongly believe that however hard they work they will not succeed. These negative thoughts become vision of your life.

Look Within

Do not believe in something, just because everyone shares the same notion. Keep questioning those ideas. Do not follow the herd blindly. If large numbers of people believe in something that does not necessarily, certify it to be true. People in old days believed that earth was flat and sun moved around it. Today, we all know this is not the truth. Even though everybody believed this, that did not mean it was right.

Constantly question yourself. It is easy and tempting to take comfort in these beliefs when we are facing hardships in life. These beliefs give you a sense of security. You are apprehensive to accept that they can be false.

If you are clear in your thoughts you will find that real belief, will stand the test of time and the wrong notions will not. Hence, remove these notions out from your life. Keep asking yourself, “Can this be trusted?” What is the guarantee that this is the truth? “Is this really the truth?”

Beliefs, which have not tested, are like fairy tales, they may comfort you at time, you may find them to pretty, find them funny, as it is what you want to be believe but not necessarily be the true.

Are these your notions about money? Do you have mentioned about these ideas about money often, seriously or casually? If you do, that

means unknowingly these notions are influencing your relationship with money.

\$ Many of the rich people have acquired money through illegal ways.

\$ All the evil in the world is caused by money.

\$ I am not worthy of being rich.

\$ Money is generated by money. As I do not have money, I cannot be become rich.

\$ Rich people are not as honest as poor.

\$ When it is about money, some people have all luck.

\$ Outrageously rich.

\$ Wealthy people are atheistic.

\$ I am not supposed to be rich and that is why am not.

\$ Rich people are exceptionally creative, gifted and intelligent.

\$ All the rich people have inherited wealth.

\$ Rich people are rude and antagonistic.

\$ All rich people are corrupt.

Whether you will have opulence of money or eke out a living will, depend upon your perception of money. You have to decide how much money you want to earn for a lavish life and makes plan accordingly.

Do you go through lots of hardships to earn money, are you doing job, which you truly hate, wealth gets attracted to you easily or you earn money without any difficulty, depends on your notion of wealth.

Your feel good factor about money depends upon your idea about money.

This you are comfortable with in your subconscious mind, which is the richest area of emotions. Your previous experience with money will decide how comfortable you are with finances.

You can experience financial well being and generate as much wealth as you wish if try to remove all the negative feelings you have because of the experience and work on it.

- ◇ Think about money as energy you move and live with, and that with letting this energy into your life will bring wealth into your life. See what difference it makes in your life.
- ◇ If you believe that money can come to you as easily as the air you breathe and see what difference this notion makes in your life.

You are determined that having all the wealth you need will make you uncomfortable with the above notion. Decide to change your notion about money, which are negative and are stopping influx of money that you are entitled to.

Chapter 8:

Goodwill and Benevolence

Synopsis

Benevolence is very important, whether through your physical work or by emotions. It is not only beneficial to person at the receiving end but also to yourself. Selflessness can be shown through various ways.

The Good

When you concentrate on others instead of yourself, positive energies build up and situations are created for success. They unravel themselves in form of unexpected and abundant positive responses. This may include change of behavior from being miser and mean to selflessness. Good luck with inflow of abundant money may come your way with such kind gestures.

A miserly man decided to pay for the education of his friend's son, whose financial background was not so strong. This gesture is out of his character. Next day all of a sudden he receives payment for the invoice, which has been pending since long.

(In the above circumstances, the miser man understood the link between forgetting his stringiness and the positive response he got from life. He also noted that the amount, which he generously gave away, was almost equal to the amount he received from the unexpected quarters)

Benevolence and generosity

You can bring good luck in your life by being kind and generous towards others. When an individual send appreciation and goodwill to his friends and different customers he was showered with good news in form of money, sales and other good lucks.

Have goodwill at work.

To attract money you need to have goodwill towards the other people around you as well as circumstance and situation around you. Goodwill in your work will attract lots of money into your life. Out flow of surplus goodwill will create inflow of surplus money. For example if a salesman puts his 100% effort in his work, it is possible that the day he will experience good luck in form of more demand, more work and more opportunities etc.

This example shows you that the use of goodwill can be directly related to money and success.

Why do goodwill and benevolence attract money?

Think of money as force and not thing. The force believes in encouraging mutual advantages relationship between individuals. Money is the power for human interchange and communication.

Money can be compared to language. Language enables human to interact with other humans. Think of a person who decides to remain silent and wants to keep all the words to himself.

Will this decision help him? Definitely no! Language itself is for communication. Language is grows and is beneficial only if we use it for communication. The more you use it the more you understand it

and are able to relate to it. Language enables a single person to communicate with the whole society. We do not store language. Therefore we can conclude that more people use our language, it much easier to relate with others. It can be applied to money.

Money is similar to language. When we relate money with others, money grows. When we help others to prosper and try to encourage successful in individual around us, we will attract money. Goodwill and benevolence will attract more flow of money into our life. The more you give, the more you receive.

Chapter 9:

Believe That It Is Easy To Make Money

Synopsis

We have some time or the other heard that we could achieve what we truly believe in. Having faith in something will help you achieve it.

Many people will discard this theory, while some may have tried doing it but may not have actually done so and still or still others who have tried it and have tasted success through it.

However, gaining success is not very easy, as you have to follow the steps in this believing process and use it in your favor.

Trust It

Answer few of the questions:

- ◇ Do you believe with all faith that there are various ways to reach your goal and you just need to find them?
- ◇ Do you have total faith in yourself and your ability to achieve whatever you desire for financially and personally?
- ◇ Do you completely believe that you will be shown right direction at right time and no matter where you are now, you will reach your destination?

If your answer for many of the above questions is in negative then it will not lead you to where you wish to reach that is success.

You need to completely believe that everything will work in your favour. The belief that you can find answer every question that arises while knowing and believing that you can and you will.

How to gain such high level of self-confidence

Start with small steps. Start by targeting small problems in your daily life like, if you are not able to find the key, keep telling yourself that you will find them.

When you really find them, you will start believing in this process. While you doing a project with strict deadline keep assuring

yourself that you will finish your project within the deadline and when you have finished the project you have developed confidence in yourself. By bringing this change in yourself, you will learn to be confident about yourself.

Stop worrying, because worrying is like not trusting yourself. Sentences like, “I worry because I may not be able clear the exams”, show your lack of confidence. By worrying, you cannot change the situation.

As you start believing yourself in making small decisions, it will become a habit with you. Therefore, when you face bigger problem in life, you know what to do. You have stopped worrying and are facing challenges with lots of self-confidence. You know what to do and have the ability to achieve what you wish for.

Steps for making self-belief a practice might look easy but you will take some time inculcate this habit. Financial success depends highly on self-belief. Without this, nothing will make sense.

Wrapping Up

Everybody wants to be rich. Some of them have already achieved this and some are trying to achieve. Many paths will lead you to financial success and the meaning for wealth is different for each of us. No matter how you define wealth, your notion of wealth will help you achieve financial success.

Having correct attitude towards money helps you accomplish financial success. It has its own presence, identity and power.

Understanding how changing your notion about money in your situation is very important.
