All files associated with the "PromoPage Generator" Script package fall under this copyright notice.

This script is NOT freeware nor a shareware. Selling or distribution of the code (in whole or in part) of this program without prior written consent is expressly forbidden.

This program is distributed "as is" and without warranty of any kind, either express or implied.

## Table Of Contents

### 1. Installation

### 2. Use Of The Script

### 3. Useful Links

The script is very easy to install and even easier to use.

However, if – after reading this guide – you still have questions, don't hesitate to contact me by submitting a ticket at my helpdesk:

<http://www.miekejanssens.net/help>

Remember to sign up for the affiliate program.

You can earn 50% commissions on every sale you refer.

**[Get Your Affiliate Link Here](#)**

# 1. Installing Promo Page Generator

## Instructions

There's really nothing to it.

All you need to do is upload the entire 'promopagegenerator' folder to your server.

**NOTE:**

*You can change the name of the folder to anything you want, but you CAN NOT rename any other file,*

If you don't have an FTP client yet, download a free copy of [SmartFTP](#)

For more info on how to FTP/CHMOD, [watch this video](#).

Once entirely uploaded, enter the URL to this folder in your browser address bar.

*<http://www.yourdomain.com/promopagegenerator>*

If you see the 'welcome' screen, your installation was successful!

**NOTE:**

*If you want, you can password protect your script to prevent some lucky finder starts using it for free. You can password protect your folder from inside your cPanel.*

## 2. Use Of The Script

If you liked the easy setup process, you'll definitely like the use of the script – it's even simpler ;o)

This is your start screen:

This page shows only a welcome message, and my recommendation for AdFactoryPro. AdFactoryPro & PPG are **complementary** to eachother: you can easily create the coolest ads with the first, then use these ads to create a page for your affiliates with the second.

**[Create Your Free AdFactoryPro Account Here](#)**

If you want to create more advanced ads, you can upgrade your membership for a small monthly fee, or get the **AdFactoryPro PLUS** script and run the program on your own server (desktop installer also included)

Now let's get back to the script.

After reading the 'Welcome' screen, click the 'How-To' tab and read the info provided. You'll find some vital info on how to create your promo tools so your affiliates can personalize your tools with their own affiliate link.

From here, I don't think the script needs much explanation. All you need to do is click the tabs one by one and fill in all the form fields.

*NOTE:*

*You can jump back and forth without losing the info you already entered.*

If you want to give your affiliates the chance to personalize the promo tools by adding their own affiliate link to it, the following is **Very Important** (with capitals):

During the entire process, you need to replace your affiliate URL with a small piece of code. You need to add the following code where ever you want your affiliate's link to appear later on:

```
<?PHP echo $_POST["link"];?>
```

Make sure you enter the code EXACTLY like it's shown. To avoid errors, copy the code from this page or from the 'How-To' info page in the script, then paste it in the appropriate place.

I made a screenshot of the 'General Info' page to show you how it's done.  
(You'll find more screenshots further on.)

### General Info

Header Image URL:

`www.adfactorypro.com/desktopinstaller/plus/images/header.jpg`

Background Image URL:

`http://adfactorypro.com/images/background.jpg`

Site Title:

AdFactoryPro PLUS

Affiliate Link:

`<?PHP echo $_POST["link"];?>`

### The other tabs:

#### **Text Links -**

The script already knows what the affiliate link is, so you only have to decide on 2 attention-grabbing, click-inviting - but informative - statements that will become the linked text.

#### **Text Links**

Link Text 1:

Create Professional Ads With Ease

Link Text 2:

Your Ultimate Ad-Creation Center

## Emails - eZine Ads

Simply type your prepared marketing emails/ezine ads in the fields. Remember to replace the affiliate URL with [the special code](#)!

### Emails

Email 1 - Title:

{FIRSTNAME}. Want To Create Professional Ads With Ease?

eMail 1 - Body:

Dear Fellow Marketer,

If you're interested in

- \* Boosting your conversion rates and
- \* Looking more professional

then this might be the most important message you'll ever read.

In a hurry? Visit

`<?PHP echo $_POST["link"];?>`

Here's what this is about...

*NOTE: Short of inspiration? [AdFactoryPro](#) will help you out!*

## Signatures - Top Sponsor Ads

Again, type your prepared signatures/top sponsor ads in the fields and replace the affiliate link with the special code.

### Signatures

2 Line Signature:

Create Professional Ads With The Click Of A Button

`<?PHP echo $_POST["link"];?>`

## Image Ads -

In the first field, enter the message you want visitors to see when they move their mouse over your banners.

Then, add 5 image URL's (use the full URL, including http://) to the fields underneath.

### Images

Image 'Alt' Text:

Create Professional Ads With Ease

Image Ad 1:

<http://www.adfactorypro.com/desktopinstaller/plus/images/promo>

Image Ad 2:

<http://www.adfactorypro.com/desktopinstaller/plus/images/promo>

## Extra

The generated promo tools page will have several 'Recommended Site' links on it (see screenshot below):

### Popular marketing forums:

[Networker's Debut Forum](#) | [Conquer Your Niche](#) | [The Warrior Forum](#) | [Digital Point Forums](#)

You can add your personal affiliate ID to these links, so you will be paid when a commission is generated.

To get your user ID's, simply click the links on the 'Extra' page one by one and sign up for every program/site. All affiliate programs are free to join.

Once you have your affiliate ID's, enter them in the form fields.

**IMPORTANT: Only enter your ID, NOT your full affiliate link.**

#### Extra

Add your **affiliate ID's** for the sites listed below. Click the links to register for the affiliate programs.

<input type="text" value="lookielookies"/>	- <a href="#">ListBandit</a>
<input type="text" value="66832"/>	- <a href="#">ListDotCom</a>
<input type="text" value="lookielookies"/>	- <a href="#">The ListMachine</a>

**There's only one exception:** In the field next to 'PromoPage Generator', enter your **FULL** affiliate link.

**NOTE:** Your affiliate ID for AdFactoryPro is your [MEMBERSHIP SITE ID](#)

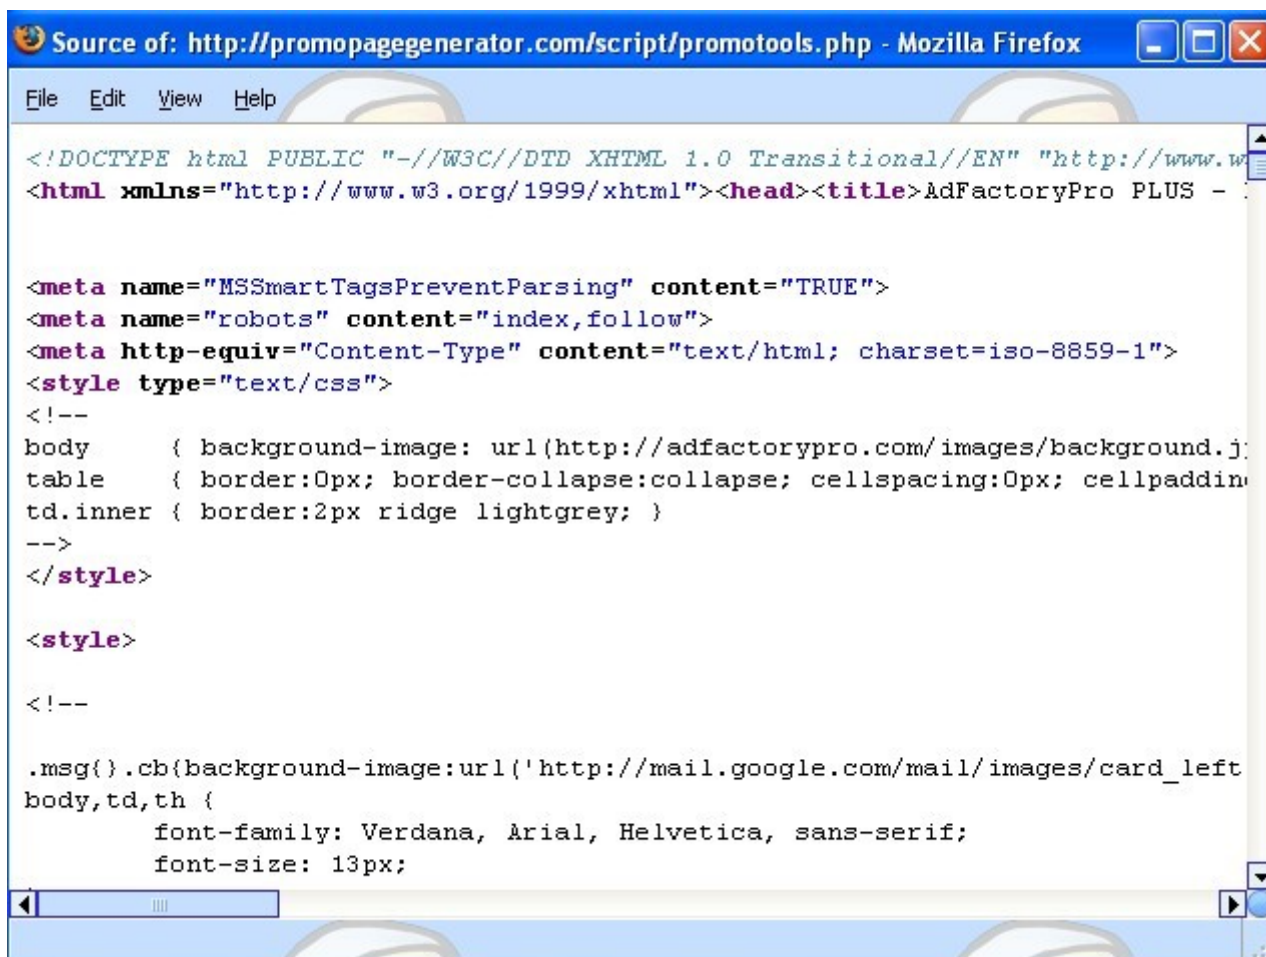

Once you have all form fields filled in, click the 'Submit' button at the bottom of the 'Extra' page. Your generated promo page will open in a new window.

**NOTE:** You'll notice some small pieces of code are showing. Don't worry about it – this is perfectly normal

Now you need to save the generated code to your desktop.

In your browser menu, click 'View' – 'Page Source'.

Your source will look something like this:

```
<!DOCTYPE html PUBLIC "-//W3C//DTD XHTML 1.0 Transitional//EN" "http://www.w
<html xmlns="http://www.w3.org/1999/xhtml"><head><title>AdFactoryPro PLUS -

<meta name="MSSmartTagsPreventParsing" content="TRUE">
<meta name="robots" content="index,follow">
<meta http-equiv="Content-Type" content="text/html; charset=iso-8859-1">
<style type="text/css">
<!--
body      { background-image: url(http://adfactorypro.com/images/background.j
table     { border:0px; border-collapse:collapse; cellpadding:0px; cellpadding
td.inner { border:2px ridge lightgrey; }
-->
</style>

<style>

<!--

.msg{} .cb{background-image:url('http://mail.google.com/mail/images/card_left
body,td,th {
    font-family: Verdana, Arial, Helvetica, sans-serif;
    font-size: 13px;
```

Copy the code and paste it into an empty text-file. Save this file as *promotools.php*. (At the bottom of the 'Save As' window, make sure you select 'All Files'.)

Bestandsnaam:  ▼ Opslaan

Opslaan als type:  ▼ Annuleren

Close both your source code window and generated promo tools page, and go back to the script. There, click the 'Finish' tab.

You need to upload the file you've just saved as '*promotools.php*' to the same folder as your product pages. You can use the provided webbased FTP utility to upload the file quick and easy.

To connect to your server, enter your server details in the form and click 'Log In'.

**NOTE:**

*You only need to enter your FTP server address (usually: <ftp.yoursite.com>) and the username and password you use to connect (usually the same as the username and password you use to log into your webhost control panel).*

Once connected, browse to your product folder and upload '*promotools.php*' to it.

Now there's only one thing left before you're all set: to allow your affiliates to create customized promo material - with their affiliate link already embedded – you need to add the special form to the page with affiliate info. (Best is to place it on the page where affiliates can find their affiliate link.)

Make sure this page and *promotools.php* are uploaded to **the same folder**.

**Preview:**

Enter Your Affiliate Link In The Box Below And Click 'Submit' To Create Your Customized Promo Material

Your Affiliate Link:

Remember to test the system because you make your pages live!

### 3. Useful Links

If you need a WYSIWYG HTML-editor, download one for free [here](#).

#### **AdFactoryPro – The Ultimate Ad-Creation Center**

Create professional ads with the click of a button.
